		SUPPLEMENT TO REPORT #	
		RESPONSIVE TO	

THIS IS UNEVALUATED INFORMATION

This report is the result of a joint collection effort by the Air Force, the Army, the Navy, and CIA and is disseminated in accordance with the provisions of NSCID #17.

1. [redacted] the Division Quartermaster Depot of the 27th Infantry Division [redacted] located in the Jozsef Bem Artillery Kaserne near Kiskunfélegyhaza (46°43'N-19°51E).
[redacted]
2. In the summer of 1956 [redacted] turned in old field kitchens of the Division to the Hungarian Army Transportation Materiel Supply Depot in Budapest (P F 5754). This depot covers a large area [redacted] At the same time [redacted] received six Model 1951 Baking Ovens (bread), 12 Model 1951 Field Kitchens for 270 people and some Model 1951 Field Kitchens for 150 people [redacted]
3. The Model 1951 Field Kitchen for 270 people [redacted] is the latest and most modern field kitchen [redacted] in the Hungarian Army. It is a truck-drawn, compact, metal unit and has the following equipment and utensils:
 - A. Two 150 liter cooking pots - these are stainless steel, have an airtight hinged cover with a steam escape valve in the center.
 - B. One 70 liter cooking pot - it is stainless steel with airtight cover with a steam escape valve in the center.
 - C. Two wooddryers - these are mounted on either side of the unit and are used to dry wood for burning in the firebox.
 - D. One installed water heater - this has a tank mounted in the unit (near the center which extends across the width of the unit. Attached to the water heater is a hot water faucet which is mounted underneath the unit at the rear and on the right side of the firebox.
 - E. One firebox - this is normally a wood burner and is mounted underneath the unit at the rear.

-2-

- F. Three rubber tires - two are on the ground and there is a spare tire which is mounted on the left side of the unit above the wheel.
- G. One telescopic smokestack - this is mounted on the left top side of the unit.
- H. One pot carrier rod - this is used to carry the cooking pots, particularly when they are hot. It is a metal rod about two meters long and 2½ centimeters in diameter. Suspended from it on two chains, which are adjustable along its length, allowing it to slide back and forth, are two hooks which hook under the handles of the cooking pots. This pot carrier rod requires two men, each carrying one end of the rod on his shoulder.
- I. Meat cutting board - this is a wooden, rectangular board which is mounted alongside the metal divider located on top of the unit. When in use, the meat cutting board is normally placed on the collapsible work table found at the front of the unit.
- J. Metal utensil recess with lid - this is located inside the unit at the front with its lid forming part of the flat top of the unit. The kitchen utensils and other miscellaneous equipment are carried in it.
- K. Kitchen utensils -
 - 1 meat fork
 - 1 boning knife
 - 1 vegetable knife
 - 1 steel sharpener
 - 1 wooden spoon
 - 1 small box for cooking tea
 - 1 small box, divided into sections, for pepper, salt and condiments
 - 1 meat fork
 - 2 canvas bags (50 x 30 centimeters) - these apparently are general purpose bags.
 - 1 wrench
 - 1 patch holder for repairing tube in case of flat (holds patch in place)
 - 1 wood saw
 - 1 saw sharpener
 - 1 lug wrench

- 4. The Model 1951 Field Kitchen for 150 people is similar in design and equipment to the one for 270 people except that it is smaller. It is either horse or truck-drawn.

- 5. [redacted] the Division Quartermaster Depot of the 27th Infantry Division had 32 of the Model 1951 Field Kitchens (for 270 people) stored in the depot.

25X1

25X1

[redacted] classified CONFIDENTIAL, is a sketch of the Model 1951 Field Kitchen for 270 People, described in this report.]
